

Pediatric Physical Therapy

Physical Therapy for Your Child

We offer outpatient services for children birth-21 years of age. Our Physical Therapists work with your child and your family for a comprehensive evaluation and assessment to create a personalized rehabilitation program to meet your needs and goals.

We work with your child to:

- Increase mobility and function
- Enhance participation in the community and at home
- Improve quality of life for children with developmental delays and special needs
- Build strength, improve balance, flexibility, coordination, and posture through play
- Optimize development and independence
- Support the use of adaptive technology and assistive devices

Valley Regional Healthcare

243 Elm Street | Claremont, NH | VRH.org
