Executive Summary

Background

Valley Regional Healthcare includes the only New Hampshire Critical Access Hospital accredited by The Joint Commission, regional home care and hospice services, two primary care practices, three specialty care centers for orthopaedics, surgery, and women's health, and two satellite outpatient facilities, featuring patient care collaborations with Norris Cotton Cancer Center for oncology and Dartmouth Hitchcock for cardiology.

Outreach and support for these broad-based community health initiatives is an important aspect that helps define VRH and their important role in the community.

As part of their ongoing efforts to serve their community, and in order to meet regulatory guidelines, VRH conducted a Community Health Needs Assessment (CHNA). The Affordable Care Act of 2010 requires not-for-profit hospitals to conduct a CHNA every three years. In addition, the State of New Hampshire requires a health assessment every five years.

VRH worked with Crescendo Consulting Group, LLC, (CCG) to bring together key healthcare and public service stakeholders, collect quantitative and qualitative data, and reach out to the community in order to elicit feedback directly from them and their service providers. The quantitative and qualitative findings included in this report are based on the most currently available data from community resources, the State of New Hampshire, and other regional sources.

While this document fulfills federal and state reporting requirements, more importantly, it serves as a guidepost for community outreach efforts and as a benchmark with which to compare future progress.

The purpose of the research design was to do the following:

- Clearly define the community served by VRH
- Define a data-based and qualitative methodology to identify needs in the community
- Develop a prioritized list of community resources
- Develop a list of healthcare resources in the service area

In order to generate the information, CCG and VRH incorporated input from persons who represent the broad interests of the community served by the hospital facility, including those with special knowledge of or expertise in public health – community opinion leaders (a diverse set of service providers), hospital service providers, and healthcare consumers. In addition, statistical data was integrated with other community data to provide a detailed profile of needs and resources.

To formally launch the needs assessment, a leadership group was convened of community leaders with a diverse breadth of community health vision, knowledge and power to impact the well being of the greater Sullivan County area. This group provided critical feedback on quantitative data, refined the list of community needs, helped to build the list of available community health resources, and assisted with the prioritization of community needs identified in this report.

The Leadership Group included the following members:

- Community Dental Care of Claremont, Sue Schroeter, Director
- Connecticut Valley Home Care, Dianne Lemay, Interim Director
- Greater Claremont Chamber of Commerce, Kelly Murphy, Interim Executive Director
- Greater Sullivan County Public Health Region, Jessica McAuliff, Regional Coordinator
- River Valley Community College, Steven Budd, President
- School Administrative Unit #6, Allen Damren, Assistant Superintendent
- Southwestern Community Services, Gail Merrill, Program Director
- Sullivan County, Greg Chanis, County Administrator
- Sullivan County Healthcare, Ted Purdy, Administrator
- Turning Points Network, Deborah Mozden, Executive Director
- Valley Regional Hospital, Associates in Medicine for Pediatrics, Shirley Tan, MD, Physician
- Valley Regional Hospital, Tracy Pike, RN, Emergency Nurse Manager
- West Central Behavioral Health, Pat Kinne, Older Adult Service Manager

Description of the Community Served

VRH serves the rural region of Sullivan County, New Hampshire with a population of over 47,000 people, living in 15 towns over 537 square miles. In addition to New Hampshire residents, several bordering towns in Vermont, especially Windsor, Weathersfield and Springfield, rely upon Valley Regional Hospital's programs and services. The following map highlights the New Hampshire communities served by VRH.

- Acworth
- Charlestown
- Claremont
- Cornish
- Croydon
- Goshen
- Grantham
- Langdon
- Lempster
- Newport
- Plainfield
- Springfield
- Sunapee
- Unity
- Washington

An additional map, which includes Sullivan County and the three Vermont towns served by VRH, is included in the appendices.

Key Demographic & Economic Indicators

As identified in the most recent 2010 US Census, Sullivan County residents tend to be slightly older and have a lower household income than State of New Hampshire averages. The table on the next page shows that the median age in Sullivan County is nearly 44 years of age (43.7) while the state average is 40 years. Similarly, the median annual household income in Sullivan County is about \$13,000 less than the state average. In Claremont, household income is more than \$21,000 (roughly 33%) below the New Hampshire median income – \$41,721 compared to \$63,277. Health and lifestyle characteristics of these areas are described on the next page and in detail in the appendices.

Key Demographic and Economic Indicators

| <i><u>Town</u></i> | 2010 <u>Population</u> | Median <u>Age</u> | Median Household <u>Income</u> | High School or <u>Higher</u> |
|------------------------|-----------------------------------|------------------------------|---|---|
| <i>Acworth</i> | 891 | 49.2 | \$47,969 | 90.4% |
| <i>Charlestown</i> | 5,114 | 43.9 | \$48,750 | 87.2% |
| <i>Claremont</i> | 13,355 | 40.6 | \$41,721 | 87.7% |
| <i>Cornish</i> | 1,640 | 48.6 | \$67,813 | 93.7% |
| <i>Croydon</i> | 764 | 48.0 | \$58,125 | 85.0% |
| <i>Goshen</i> | 810 | 47.0 | \$48,664 | 85.1% |
| <i>Grantham</i> | 2,985 | 47.3 | \$87,245 | 96.9% |
| <i>Langdon</i> | 688 | 45.5 | \$67,292 | 90.4% |
| <i>Lempster</i> | 1,154 | 46.1 | \$55,577 | 84.5% |
| <i>Newport</i> | 6,507 | 41.7 | \$45,794 | 84.4% |
| <i>Plainfield</i> | 2,364 | 45.2 | \$85,966 | 93.1% |
| <i>Springfield</i> | 1,311 | 42.3 | \$75,625 | 95.2% |
| <i>Sunapee</i> | 3,365 | 46.2 | \$59,702 | 94.3% |
| <i>Unity</i> | 1,671 | 49.7 | \$62,500 | 88.8% |
| <i>Washington</i> | 1,123 | 46.5 | \$47,250 | 89.4% |
| <i>Sullivan County</i> | 43,742 | 43.8 | \$50,689 | 89.0% |
| <i>New Hampshire</i> | 1,316,470 | 41.1 | \$63,277 | 90.5% |
| <i>U.S.</i> | 308,745,538 | 37.2 | \$51,914 | 84.6% |

Assessment Methodology

The CHNA methodology is designed to reach out to a wide breadth of consumers and health-related service providers in order to get a comprehensive view of Sullivan County health needs. The methodology also contains components that will help VRH prioritize the needs and establish a basis for continued community engagement.

Qualitative and Quantitative Methods

The VRH CHNA methodology includes qualitative and quantitative components. The major sections of the methodology include the following:

- Strategic secondary research
- Quantitative analysis and qualitative review of existing data
- Qualitative discussion groups with healthcare consumers, service providers, and other community opinion leaders
- Needs prioritization using a modified Delphi process

Each of the components of the CHNA methodology is described in the table on the next page.

Valley Regional Hospital – Community Health Needs Assessment Methodology

| <u>Method and Description</u> | <u>Data Source Examples</u> | <u>Data Goal</u> |
|--|--|---|
| <i><u>Strategic secondary research.</u> This type of research includes a thorough analysis of previously published materials that provide insight regarding the community profile and health-related measures. The “demographics and key indicators” table is shown above while others follow or are included in the appendices of this report.</i> | <ul style="list-style-type: none"> • Demographic Data <ul style="list-style-type: none"> ○ U.S. Census ○ State of New Hampshire, Employment Security ○ State of New Hampshire, Office of Planning • Health Risk Behavior Data from the U.S. Centers for Disease Control and Prevention <ul style="list-style-type: none"> ○ Behavioral Risk Factor Surveillance System Survey (BRFSS) ○ Youth Risk Behavior Survey (YRBS) ○ State of New Hampshire, Department of Education • Existing materials from other organizations | Strategic secondary research data goals include properly framing the service area in terms of lifestyle, demographic factors, and general health trends, and to better understand previous research conducted for the hospital. |
| <i><u>Quantitative analysis and qualitative review of existing survey data.</u> In order to gain a better understanding of the relative magnitude of morbidity and mortality data, Crescendo analyzed the secondary data and identified regional outliers, where</i> | <ul style="list-style-type: none"> • Strategic secondary data (above) • State of New Hampshire, Division of Public Health | Goals of this component of the methodology include developing a better understanding of community health, morbidity and mortality |

|--|---|--|
| <p><i>possible.</i></p> | <ul style="list-style-type: none"> • Hospital Discharge Data • Birth and Death Statistics • Cancer Registry | <p>data, key health-related factors that impact the service area, and disease-based incidence levels that exceed the regional averages. The results of this activity are aggregated with primary research gathered in the qualitative discussion groups and the prioritization process.</p> |
| <p><i><u>Four qualitative discussion groups with healthcare consumers, service providers, and other community opinion leaders. The discussion groups attained direct insight from a breadth of consumers and community groups regarding their perceptions of healthcare service gaps and helped to triangulate information gleaned through review of the quantitative data.</u></i></p> <p><i><u>In order to gain the perspective of a diverse set of community stakeholders, VRH conducted four focus group discussions with the following community segments:</u></i></p> <ul style="list-style-type: none"> • <i><u>Leadership Group Members. The Leadership Group included executives from service area organizations that have direct contact with healthcare consumers and/or provide affiliated services. The Group helped identify an extensive list of community resources, health needs, and service gaps. They also reviewed secondary data and provided feedback on the results of the community opinion leader discussion group. Focus groups were conducted in November 2011 and March 2012.</u></i> | <p>A sample of the community groups who participated in the research is listed below, and a complete list is shown in the Appendices.</p> <ul style="list-style-type: none"> • Charlestown Police Department • Cinnamon Street Early Education & Childcare Center • Claremont Soup Kitchen • Community Dental Care of Claremont • Golden Cross Ambulance • Greater Sullivan County Public Health Region • Healthcare Consumers | <p>Discussion group goals involve creating a spanning list of community health needs. To thoroughly do so, the research includes extensive input from healthcare consumers and community groups, all in an effort to “cast a broad net” across the service area, especially among the underserved.</p> |

| <i><u>Method and Description</u></i> | <i><u>Data Source Examples</u></i> | <i><u>Data Goal</u></i> |
|--|---|---|
| <ul style="list-style-type: none"> <i>Healthcare Consumers. Consumer sectors who participated in the Valley Regional Hospital CHNA discussion group include the homeless, people from diverse age groups and economic strata, individuals with varying degrees of chronic illnesses, and others. Healthcare consumers provided insights regarding community health needs and reflected on the results of the secondary data research.</i> <i>Community Opinion Leaders. The Community Opinion Leader Group was comprised of healthcare consumers who live in Sullivan County and also provide community services such as faith-based networking, in-school nursing, public safety, behavioral health counseling, senior housing, and others. Members of this group also contributed their thoughts regarding community needs and insight about ways that disparate community organizations may be able to work together with VRH to address needs.</i> | <ul style="list-style-type: none"> Members of the Homeless Community River Valley Community College ServiceLink Sturm Ruger | |
| <p><i><u>Needs prioritization using a modified Delphi process. The Delphi Method was pioneered by the RAND Corporation in the 1950s and 1960s. It is a quantitative and qualitative survey method that is used to collect, distill, and reach prioritized consensus around creative ideas and/or qualitative issues and questions.</u></i></p> | <p>Crescendo worked with VRH to implement a modified Delphi process to prioritize an initial list of 37 community health needs that were identified during the discussion groups noted above.</p> | <p>The goal of the modified Delphi process is to prioritize the community health needs identified in prior research and to build quantitative and qualitative support among the Leadership Group.</p> |

| <i><u>Method and Description</u></i> | <i><u>Data Source Examples</u></i> | <i><u>Data Goal</u></i> |
|---|---|-------------------------|
| <p><i>In this phase of the research, Leadership Group members rated health initiatives and provided qualitative feedback. The modified Delphi method included three steps.</i></p> <ul style="list-style-type: none"> <i>• Leadership Group members were asked to complete a survey in which they were to quantitatively and qualitatively evaluate each of the 37 community needs identified in earlier research and to submit their responses to CCG. They were also asked to provide feedback regarding the rationale for their rating.</i> <i>• CCG rank-ordered the needs based on the average score and aggregated the qualitative comments. The results were sent to Leadership Group members in the form of a second survey. The second survey included the same list of 37 needs, as well as the ranking from the previous survey and a list of qualitative comments. Leadership Group members re-rated the 37 needs based on their own opinions and the insights of others as expressed in the list of aggregated comments. Group members submitted their responses to CCG.</i> | <p>The comprehensive list of 37 needs is contained in the appendix of this report. Detailed descriptions of the top ten prioritized needs are contained later in this report.</p> | |

List of Prioritized Needs

Based on input from the Leadership Group meetings; analysis of local, State of New Hampshire, and federal quantitative data; community input; and, the needs evaluation process, the prioritized list of community needs is shown in the table below.

| <i>Prioritized Community Needs</i> | | |
|------------------------------------|---|------------------------------|
| <u>Rank</u> | <u>Health Need</u> | <u>Code Number **</u> |
| 1 | Availability of affordable healthcare, prescriptions, and related services | 101 |
| 2 tie | Drug and alcohol abuse early detection and treatment | 407 |
| 2 tie | Managing the expected growth in senior health services | 501, 603 |
| 2 tie | Wellness initiatives and the individual's ability to maintain a healthy lifestyle | 999 |
| 5 | Obesity / Nutrition / Exercise education and services | 420, 421, 422 |
| 6 tie | Addictions awareness and education | 400, 407 |
| 6 tie | Behavioral Health early detection and intervention | 370 |
| 8 | Transportation to/from healthcare service providers | 601 |
| 9 | Dental health services | 121 |
| 10 tie | Chronic disease screenings - broad spectrum (hypertension, cancer, heart disease, stroke) | 300, 350 |
| 10 tie | Elder Care Services and Dementia Spectrum Issues | 372, 501, 603 |

** NOTE: Code numbers shown are used by the State of New Hampshire for the Community Benefits reporting to categorize needs and develop clearer, more uniform understanding of initiatives. See Appendix I

Below is a brief summary of the eleven (11) leading community needs, as established by consensus among key stakeholders and community representatives.

- Availability of affordable healthcare, prescriptions, and related services. While VRH provided over \$5,871,000 of charity care and non-reimbursable Medicare/Medicaid services to community members in 2010, healthcare costs continue to be a tremendous burden on consumers, be it for pharmacy or direct healthcare services. These increasing costs were cited by the Leadership Group as a reason for delayed healthcare treatment, often leading to an Emergency Department visit to treat an avoidable condition or altering medication plans to extend its use and decrease the cost.

- Drug and alcohol abuse early detection and treatment. Leadership Group members identified drug and alcohol abuse detection and treatment as an ongoing community need that has far-reaching effects on the afflicted, his or her families, employment status, and other social issues. According to 2009 BRFSS and YRBSS data, two of five New Hampshire high school students (39%) had at least one drink of alcohol on at least one day (during the 30 days before the survey); approximately 23% had had five or more drinks of alcohol in a row within a couple of hours on at least one day (during the 30 days before the survey). Approximately 25% had used marijuana one or more times during the same time period. Similarly, the New Hampshire Department of Health and Human Services reports that 13.8% of adults are considered “binge drinkers.”

The Leadership Group noted the goals and achievements of Communities United Regional Network, and suggested that VRH extend a supportive collaboration opportunity to support the Regional Network’s mission *to engage members of our communities in a coordinated effort to promote behaviors that measurably improve the health and well being of our youth and adults with a focus on alcohol, tobacco, and other drug prevention.*

- Managing the expected growth in senior health services

According to 2010 data, one in six Sullivan County residents is over 64 years of age. In some of communities, the percentage of seniors is over 20% and expected to rise to nearly 25% over the next decade. In addition, Sullivan County has the fourth highest rate of elderly in poverty.

By 2030 the elderly population is expected to increase to 36.5%.

The overall population of Sullivan County is also expected to increase (see the table on the next page). The general population growth – combined with the increase in the percentage of seniors – will increase the magnitude of the issue of providing services to this segment of the population.

| <i>Percent of Population Over 64 Years</i> | |
|---|---------------------------------|
| <u><i>Town</i></u> | <u><i>Percentage</i></u> |
| <i>Acworth</i> | 18.2% |
| <i>Charlestown</i> | 16.2% |
| <i>Claremont</i> | 15.4% |
| <i>Cornish</i> | 15.2% |
| <i>Croydon</i> | 15.8% |
| <i>Goshen</i> | 17.5% |
| <i>Grantham</i> | 20.9% |
| <i>Langdon</i> | 17.4% |
| <i>Lempster</i> | 12.6% |
| <i>Newport</i> | 16.0% |
| <i>Plainfield</i> | 13.3% |
| <i>Springfield</i> | 14.4% |
| <i>Sunapee</i> | 19.1% |
| <i>Unity</i> | 21.4% |
| <i>Washington</i> | 20.4% |
| <i>Sullivan County (Weighted Average)</i> | 16.5% |

Source: 2011 New Hampshire State Health Profile, p. 16

***The population of Sullivan County is projected to increase to 50,132 by 2030 (a 15% increase from 2010)

- Wellness initiatives and the individual's ability to maintain a healthy lifestyle

Many Leadership Group members indicate that Sullivan County has a wealth of natural resources and “healthy living” opportunities. While saying that wellness initiatives and other proactive health-related activities are very important, they also mention that it may be helpful for an organization such as VRH or a public health association to take the lead on communicating the benefits of healthy living and ways to do so.

- Obesity / Nutrition / Exercise. Recent BRFSS data shows that obesity rates in the Sullivan County Public Health Region¹ are on par with New Hampshire state averages. Exercise, consumption of fruits and vegetables, and smoking rates are also similar to State levels. However, the data supports the Leadership Group’s findings that there remains a need for improved community health priorities focusing on these important areas.

- Addictions - Awareness and Education. Some Leadership Group members commented that this community need was perceived to be in the same category as “drug and alcohol abuse

¹ Note that the Greater Sullivan County Public Health Region includes Acworth, Charlestown, Claremont, Croydon, Goshen, Langdon, Lempster, New London, Newbury, Newport, Springfield, Sunapee, Sutton, Unity, and Wilmot.

early detection and treatment” (above). However, others indicated that the “addictions” encompasses a much broader spectrum than solely drugs and alcohol, and it would be preferable to identify it as a separate and important community need.

- Behavioral Health – early detection and intervention. Behavioral health is a broad enough category that it impacts every age group in the service area. Leadership Group members identified the need for increased learning disabilities screenings for children and stress management and marriage / parenting / family dynamics counseling for working adults. The group also recognized a significant decrease in accessible mental health treatment and counseling services, as well as dementia spectrum issues and socialization issues for seniors.
- Transportation Services Availability. Limited public transportation can reduce access to care – especially for the elderly and low income populations. Discussion group participants noted the significant collaborative service provider contributions of the Community Mobility Project, now known as the Sullivan County Regional Transportation Council; however, with such a tremendous and ongoing need, collaborative efforts between VRH, service providers and public/private transportation companies should be an ongoing effort.
- Dental Health Services. Dental issues were identified by community members representing all age groups – children, adults, and senior – as significant needs in the region. VRH has been a lead organization (in collaboration with New London Hospital) in recognizing the oral health needs and establishing the Community Dental Care of Claremont, a nonprofit organization dedicated to serving Sullivan County residents without a dental home.
- Chronic Disease Screenings – Heart Disease, Cancer, and Hypertension. Heart disease, cancer, and stroke are the leading causes of death in VRH’s service area. Specifically, death rates for two of these diseases are higher in the Sullivan County than for the overall State of New Hampshire.

| <i>Leading Causes of Death in Sullivan County 2003-2007</i> | | |
|--|--------------------------------------|------------------------------------|
| <i>Rates per 100,000 people</i> | | |
| <u><i>Cause of Death</i></u> | <u><i>Sullivan County</i></u> | <u><i>New Hampshire</i></u> |
| <i>Heart Disease</i> | 215.5 | 179.4 |
| <i>Cancer</i> | 196.3 | 183.7 |
| <i>Stroke</i> | 48.5 | 35.5 |
| <i>Chronic Lower Respiratory Diseases</i> | 47.9 | 46.2 |
| <i>Accidents</i> | 40.1 | 35.2 |
| <i>Dementia</i> | 27.6 | 26.1 |
| <i>Diabetes</i> | 24.9 | 22.5 |
| <i>Influenza and Pneumonia</i> | 21.5 | 19.4 |
| <i>Suicide</i> | 13.1 | 11.2 |
| <i>Kidney Disease</i> | 10.3 | 12.4 |

Source: State of New Hampshire, Health Web Reporting and Querying System (Health WRQS, 2012); National Vital Statistics Report, Vol. 56, No. 10, "Deaths: Final Data for 2005"

- Elder Care Services and Dementia Spectrum Issues. As noted in the “senior services” entry two pages above, Leadership Group members agree that elder services are a growing need. Dementia spectrum services may be considered a sub-category within the more general “senior services” area. With the median age of some communities approaching 50 years, there will be increasing needs for the elderly. Demographic data shows that the median age in the service area is 43.8 years – higher than the New Hampshire state figure and far above the U.S. median.

Appendix A: Leadership Group Presentation Details

Two focus groups were held with the Leadership Group – November 2011 and March 2012.

- During the first session, held at the outset of the project, Leadership Group members critiqued the project methodology and the strategic purpose of the community assessment, provided their insights regarding effective ways to gather pertinent information (quantitative and qualitative), and helped generate an initial list of community needs, available resources, and potential service gaps.
- The second meeting included a review of community health data and the findings of the community focus group. Based on these two major research components, the Leadership Group helped refine and append the initial list of needs, resources, and service gaps. The moderator's guide included in the meeting is attached in a separate appendix.

Throughout the project, information was exchanged as needed via e-mail or telephone conversations with Leadership Group members and others.

Appendix B: Health Issues Evaluated in the Modified Delphi Method

Discussion groups that included healthcare consumers, Leadership Group members, and community opinion leaders identified 37 community health needs. Leadership Group members were then asked to rate the needs on a 5-point scale during the prioritization process described above in order to develop a ranked list. The results of the evaluation are contained in the table below.

| <i>Health Issues Evaluated in the Modified Delphi Method</i> | | |
|--|--|--------------------|
| <i><u>Community Need</u></i> | <i><u>Survey Average Score (5-point Scale)</u></i> | <i><u>Rank</u></i> |
| <i>Availability of affordable healthcare, prescriptions, and related services</i> | 4.29 | 1 |
| <i>Drug and alcohol abuse early detection and treatment</i> | 4.00 | 2 |
| <i>Managing the expected growth in senior health services</i> | 4.00 | 2 |
| <i>Wellness initiatives and the individual's ability to maintain a healthy lifestyle</i> | 4.00 | 2 |
| <i>Obesity / Nutrition / Exercise education and services</i> | 3.88 | 5 |
| <i>Addictions - Awareness and education</i> | 3.86 | 6 |
| <i>Behavioral health - early detection and intervention</i> | 3.86 | 6 |
| <i>Transportation to/from healthcare service providers</i> | 3.75 | 8 |
| <i>Dental health services</i> | 3.71 | 9 |
| <i>Chronic disease screenings - broad spectrum (hypertension, cancer, heart disease, stroke)</i> | 3.57 | 10 |
| <i>End of life issues (including palliative care)</i> | 3.57 | 10 |
| <i>Elder care services</i> | 3.50 | 12 |
| <i>Smoking cessation services</i> | 3.50 | 12 |
| <i>Drug and alcohol abuse prevention</i> | 3.43 | 14 |
| <i>Mammography screenings</i> | 3.38 | 15 |
| <i>Women's health - comprehensive gynecology and reproductive care for women in all stages of life</i> | 3.38 | 15 |
| <i>Communication between community service providers regarding the breadth of services available</i> | 3.29 | 17 |
| <i>Coordination of care between provider organizations</i> | 3.29 | 17 |

Health Issues Evaluated in the Modified Delphi Method

| <i><u>Community Need</u></i> | <i><u>Survey Average Score (5-point Scale)</u></i> | <i><u>Rank</u></i> |
|--|--|--------------------|

Appendix C: BRFSS and YRBS Data

Comparison Between NH Students and U.S. Students 2009 YRBS

The Youth Risk Behavior Survey (YRBS) monitors priority health risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. The national YRBS is conducted every two years during the spring semester and provides data representative of 9th through 12th grade students in public and private schools throughout the United States. The New Hampshire YRBS is also conducted every two years and provides data representative of 9th through 12th grade students in public schools throughout New Hampshire.

New Hampshire, High School Youth Risk Behavior Survey, 2009

| <i>BRFSS and YRBS Data, 2009</i> | | | | | |
|--|--|--------------------|--|--|-----------------------------|
| <i><u>Question</u></i> | <i>Percent by Gender (95% confidence interval)</i> | | <i>Statistical Significance at 95% Confidence</i> | | |
| | <i><u>Female</u></i> | <i><u>Male</u></i> | <i><u>Female More Likely Than Male</u></i> | <i><u>Male More Likely Than Female</u></i> | <i><u>No Difference</u></i> |
| <i>Rarely or never wore a bicycle helmet (among students who had ridden a bicycle during the 12 months before the survey)</i> | 57.0 (50.1–63.8) | 66.3 (60.6–71.6) | | X | |
| <i>Rarely or never wore a seat belt (when riding in a car driven by someone else)</i> | 11.4 (8.5–15.2) | 14.0 (10.6–18.4) | | | X |
| <i>Rode with a driver who had been drinking alcohol one or more times (in a car or other vehicle during the 30 days before the survey)</i> | 24.6 (20.2–29.6) | 21.7 (18.8–24.9) | | | X |
| <i>Drove when drinking alcohol one or more times (in a car or other vehicle during the 30 days before the survey)</i> | 7.8 (5.5–10.9) | 9.0 (6.7–12.1) | | | X |

BRFSS and YRBS Data, 2009

| <i>Question</i> | <i>Percent by Gender (95% confidence interval)</i> | | <i>Statistical Significance at 95% Confidence</i> | | |
|---|--|------------------|---|---|----------------------|
| | <i>Female</i> | <i>Male</i> | <i>Female More Likely Than Male</i> | <i>Male More Likely Than Female</i> | <i>No Difference</i> |
| <i>Carried a weapon on school property on at least 1 day (for example, a gun, knife, or club during the 30 days before the survey)</i> | 3.4 (2.1–5.3) | 13.7 (10.7–17.4) | | X | |
| <i>Did not go to school because they felt unsafe at school or on their way to or from school on at least 1 day (during the 30 days before the survey)</i> | 4.8 (2.8–8.2) | 4.2 (2.8–6.4) | | | X |
| <i>Threatened or injured with a weapon on school property one or more times (for example, a gun, knife, or club during the 12 months before the survey)</i> | — | — | | | |
| <i>In a physical fight on school property one or more times (during the 12 months before the survey)</i> | 6.8 (4.8–9.5) | 11.2 (8.6–14.4) | | X | |
| <i>Bullied on school property (during the 12 months before the survey)</i> | 24.4 (20.5–28.8) | 19.9 (16.0–24.4) | | | X |
| <i>Felt sad or hopeless (almost every day for 2 or more weeks in a row so that they stopped doing some usual activities during the 12 months before the survey)</i> | 32.1 (28.3–36.2) | 18.4 (15.4–21.9) | X | | |
| <i>Seriously considered attempting suicide (during the 12 months before the survey)</i> | 13.8 (10.7–17.7) | 10.2 (7.8–13.3) | | | X |
| <i>Made a plan about how they would attempt suicide (during the 12 months before the survey)</i> | 11.9 (8.8–15.9) | 7.7 (5.8–10.2) | X | | |
| <i>Attempted suicide one or more times (during the 12 months before the survey)</i> | 5.1 (3.1–8.3) | 4.2 (2.7–6.6) | | | X |
| <i>Suicide attempt resulted in an injury, poisoning, or overdose that had to be treated by a doctor or nurse (during the 12 months before the survey)</i> | 1.6 (0.7–3.6) | 1.6 (0.9–2.8) | | | X |
| <i>Carried a weapon on at least 1 day (for example, a gun, knife, or club during the 30 days before the survey)</i> | — | — | | | |

Notes:

Created by statecancerprofiles.cancer.gov on 04/04/2012 2:33 pm.

[State Cancer Registries](#) may provide more current or more local data.

† Incidence rates (cases per 100,000 population per year) are age-adjusted to the [2000 U.S. standard population](#) (19 age groups: <1, 1-4, 5-9, ..., 80-84, 85+). Rates are for invasive cancer only (except for bladder cancer which is invasive and in situ) or unless otherwise specified. Rates calculated using SEER*Stat. Population counts for denominators are based on Census populations as modified by NCI. The U.S. populations included with the data release have been adjusted for the [population shifts due to hurricanes Katrina and Rita](#) for 62 counties and parishes in Alabama, Mississippi, Louisiana, and Texas. The 1969-2008 U.S. Population Data File is used for SEER and NPCR incidence rates.

§ Because of the impact on Louisiana's population for the July - December 2005 time period due to Hurricanes Katrina/Rita, [SEER excluded Louisiana cases](#) diagnosed for that six month time period. The count has been suppressed due to data consistency issues.

¹ Source: CDC's National Program of Cancer Registries Cancer Surveillance System (NPCR-CSS) November 2010 data submission and [SEER November 2010 submission](#).

⁶ Source: State Cancer Registry and the CDC's National Program of Cancer Registries Cancer Surveillance System (NPCR-CSS) November 2010 data submission. State rates include rates from metropolitan areas funded by [SEER](#).

[Interpret Rankings](#) provides insight into interpreting cancer incidence statistics. When the population size for a denominator is small, the rates may be unstable. A rate is unstable when a small change in the numerator (e.g., only one or two additional cases) has a dramatic effect on the calculated rate.

Appendix H: Leadership Group / Focus Group Moderator's Guide

Valley Regional Hospital Community Assessment

Focus Group Discussion Guide

Focus Group Discussion Guide

Introduction

- *Welcome participants and introduce yourself.* Good evening. I'm _____. Thank you for taking the time to join us for this important discussion.
- *Explain the general purpose of the discussion.* As you were told in the recruiting process, the purpose of the discussion is to learn more about community health-related needs and currently available resources, and to collect your insights regarding service gaps, and ways to better meet needs.
- *Explain the necessity for note-taking, audiotaping, and confidentiality.* The session is being audiotaped for future reference. I will be taking notes for a summary of the session which will indicate the themes that emerged. However, specific comments and experiences will not be attributed to any one individual in the summary report. Please consider what you hear here to be confidential.
- *Describe logistics.* The restrooms are located _____. There will be a break approximately half way through the discussion. Your total time here should not last more than two hours.
- *Seek participants' honest thoughts and opinions.* Frank opinions are the key to this process. There is no right or wrong answers to questions I'm going to ask. I'd like to hear from each of you and learn more about your opinions, both positive and negative.
- *Describe protocol for those who have not been to a group before.* We would like the discussion to be informal, so there's no need to wait for us to call on you to respond. In fact, I'd encourage you to respond directly to the comments other people make. If you don't understand a question, please let me know. We are here to ask questions, listen, and make sure everyone* has a chance to share.
- *Questions?* Do you have any questions for me before we start?

CURRENT INVOLVEMENT AND EXPERIENCE IN THE COMMUNITY

1. To start, let's take a minute to introduce ourselves around the table. Please tell us your name, the organization where you work, your job title, and a little about what your does in the community.
 - PROBES: What was your role in the community activities listed?
 - What was the outcome of your efforts?
2. You all encompass a wide variety of community services. Let's think about the framework for a minute and define "community health." What does the phrase mean in terms of objectives and services – "how wide do we cast the net"? [DEVELOP WHITE BOARD LISTS]
 - PROBES: Types of issues (disease management, behavioral health, social services, etc.), target groups, or individuals?
3. I'd like to quickly go around the room. In **your particular area of service or knowledge**, what are the biggest community health issues that YOUR ORGANIZATION addresses?

* Please note: We will not address every issue with every person or even every group, but we will cover the subject areas as they arise. Also, specific topics may be emphasized for specific user insight.

CURRENT NEEDS

4. Next, I'd like to talk about the most **critical community health** needs and their impact – particularly as they relate to activities where Valley Regional Hospital may be able to contribute. Based on what you've said so far, you've mentioned three broad categories of needs: disease management / general healthcare, behavioral health, and social services. [I WILL MODIFY THIS LIST BASED ON ACTUAL RESPONSES.] Let's take them one at a time.
- Disease management and general healthcare (e.g., diabetes, cancer, cardio-vascular disease, hypertension, infectious disease, Alzheimer's, wellness initiatives, etc.)
 1. PROBE: What are the more important issues in the community?
 2. [FOR EACH] How well are they met? Who currently provides the services?
 - Behavioral health (e.g., responses to stress, domestic violence, risky behaviors, general clinical MH issues, etc.)
 1. PROBE: What are the more important issues in the community?
 2. [FOR ONES POTENTIALLY WITHIN Valley Regional Hospital's PURVIEW] How well are they met? Who currently provides the services?
 - Social services (e.g., D&A abuse, homelessness, youth-oriented programs, elder care, smoking cessation, etc.).
 1. PROBE: What are the more important issues in the community?
 2. [FOR ONES POTENTIALLY WITHIN Valley Regional Hospital's PURVIEW] How well are they met? Who currently provides the services?

GAPS

5. [IF NOT CLEAR FROM EARLIER DISCUSSIONS] Which of the issues that you mentioned affect the largest numbers of people?
6. Given the community health needs that we've discussed, describe the gap between the community need and the services available to meet the need. [WE WILL REVIEW MAJOR ONES AS NOTED IN PRIOR SECTION.]
- Where should we be more vigilant?
7. Over the next three to five years, what community health needs do you expect to grow fastest?

ADDRESSING GAPS

Now I would like to speak a little about the ways to better meet community health needs, as well as the role of Valley Regional Hospital and your organization or the target populations you serve.

8. What are the critical challenges to better serving the target populations?
- PROBE: Where are the overlaps across organizations?
9. ["SILOS" vs "COOPERATIVE EFFORTS" ISSUE] You've done a good job naming community health needs, available resources, and gaps. You also just mentioned that – generally speaking – efficient use of resources and clarity of focus, [AND OTHER THINGS AS LISTED] are important. To what degree do groups that you represent work cooperatively on projects?
10. Regarding the needs and gaps that we've discussed, where do you think Valley Regional Hospital could make an impact? Why? How?

11. If there was ONE project that Valley Regional Hospital would develop that impacted target populations with whom **YOU** provide services, what would be your first choice?
 - PROBE: Why? What do you think that Valley Regional Hospital could bring to the table?
 - Is this a short-term project or a long-term project?
12. Are there any other community health objectives that are unique to this area? If so, what are they and why are they unique?
13. Is there anything about the area that makes it easier or more difficult to meet community health needs compared to other places?
14. Can we assume that different population segments have different health needs?
 1. Children
 2. Young adults
 3. Middle aged adults
 4. Seniors
 - What do you think would be the greatest needs for each of the following population groups?
 - Why?
 - Is it a growing issue?
 - PROBE: How do you think that they can be reached?

Closing

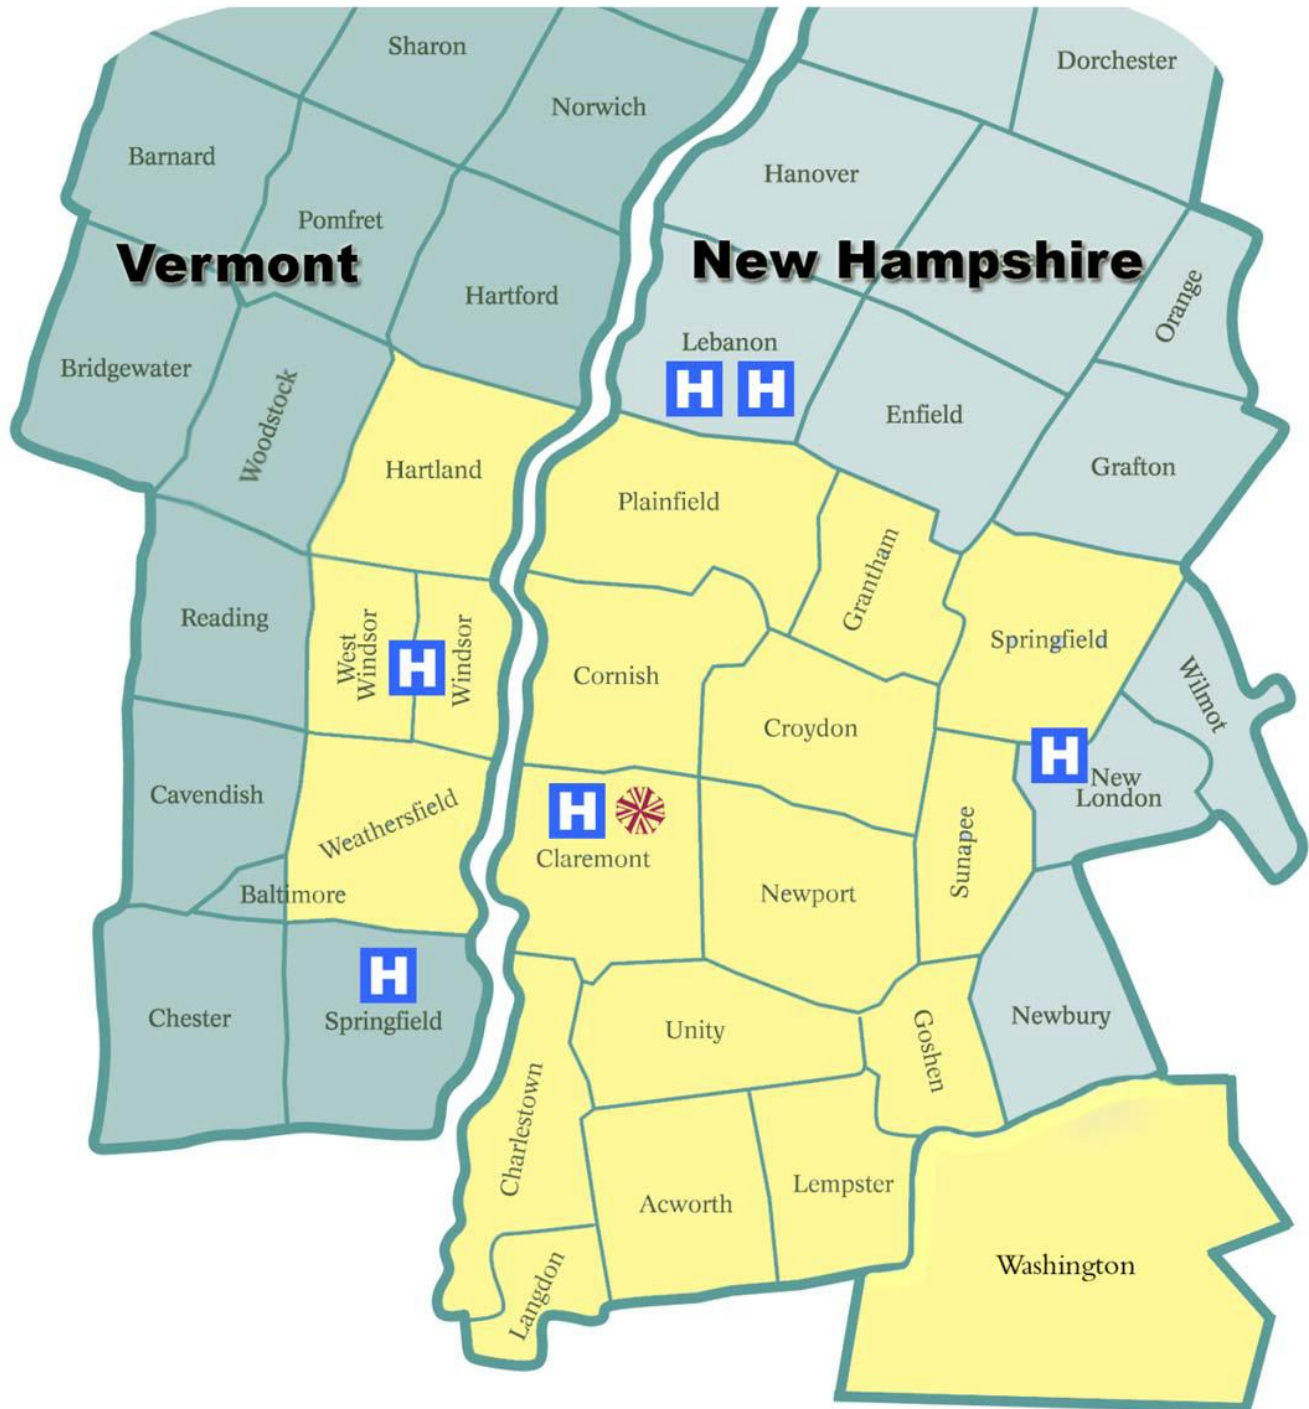

15. Finally, if you could change one thing with COMMUNITY HEALTH in the area, what would it be?

Thank you very much again for your time and thoughtful responses to our questions.

Appendix I: Participating Community Groups

- Cinnamon Street Early Education & Childcare Center, Patty Harford, Executive Director
- Claremont Police Department, Alex Scott, Chief of Police
- Claremont Soup Kitchen, Jan Bunnell, Executive Director
- Community Dental Care of Claremont, Sue Schroeter, Director
